

# Science Everywhere

This module is designed to help you explore how science affects your life each day.

- Choose A or B or C and complete ALL the requirements.
  - Watch an episode or episodes (about one hour total) of a show about anything related to science. Then do the following:
    - Make a list of at least two questions or ideas from what you watched.
    - Discuss two of the questions or ideas with your counselor.

*Some examples include—but are not limited to—shows found on PBS ("NOVA"), Discovery Channel, Science Channel, National Geographic Channel, TED Talks (online videos), and the History Channel. You may choose to watch a live performance or movie at a planetarium or science museum instead of watching a media production. You may watch online productions with your counselor's approval and under your parent's supervision.*

- Read (about one hour total) about anything related to science. Then do the following:
  - Make a list of at least two questions or ideas from what you read.
  - Discuss two of the questions or ideas with your counselor.

*Books on many topics may be found at your local library. Examples of magazines include but are not limited to Odyssey, KIDS DISCOVER, National Geographic Kids, Highlights, and OWL or owlkids.com .*

- Do a combination of reading and watching (about one hour total) about anything related to science. Then do the following:
  - Make a list of at least two questions or ideas from what you read and watched.
  - Discuss two of the questions or ideas with your counselor.

- Complete ONE adventure from the following list. (Choose one that you have not already earned.) Discuss with your counselor what kind of science, technology, engineering, or math was used in the adventure.

### Wolf Cub Scouts

Adventures in Coins  
Collections and Hobbies  
Digging in the Past  
Germs Alive!  
Grow Something

### Bear Cub Scouts

A Bear Goes Fishing  
Bear Picnic  
Critter Care

### Webelos Scouts

Camper  
Earth Rocks!  
Maestro!

- Act like a scientist! Explore EACH of the following:

- With your counselor, choose a question you would like to investigate. Here are some examples only (you may get other ideas from your adventure activities):
  - Why do rockets have fins? Is there any connection between the feathers on arrows and fins on rockets?
  - Why do some cars have spoilers? How do spoilers work?
  - If there is a creek or stream in your neighborhood, where does it go? Does your stream flow to the Atlantic or the Pacific ocean?
  - Is the creek or stream in your neighborhood or park polluted?
  - What other activity can you think of that involves some kind of scientific questions or investigation?
- With your counselor, use the scientific method/process to investigate your question. Keep records of your question, the information you found, how you investigated, and what you found out about your question.
- Discuss your investigation and findings with your counselor.

- Visit a place where science is being done, used, or explained, such as one of the following: zoo, aquarium, water treatment plant, observatory, science museum, weather station, fish hatchery, or any other location where science is being done, used, or explained.

- During your visit, talk to someone in charge about science.
- Discuss with your counselor the science done, used, or explained at the place you visited.

- Discuss with your counselor how science affects your everyday life.
